The Architect Registration Exam (ARE) is part of the licensing requirements for U.S. and Canadian architects. A computerized, closed-book exam, the ARE is administered year-round at a network of test centers.The topics represented on the ARE may be roughly divided into two areas: structural and nonstructural. We offer two primary study guides for the exam -- one volume devoted to each area. Each volume includes concise reviews of the exam topics, with practice problems and solutions.Volume I: Structural Topics offers a comprehensive review of ARE structural exam topics, including structural systems, building loads, wood and steel construction, soils and foundations, and lateral forces. The book provides 160 practice questions, with solutions, and test-taking strategy. The text is enhanced by illustrations, figures, and tables, along with a detailed index.

Based on the Institute of Concrete Technology's Advanced Concrete Technology Course, these four volumes are a comprehensive educational and reference resource for the concrete materials technologist. An expert international team of authors from research, academia and industry has been brought together to produce this unique series. Each volume deals with a different aspect of the subject: constituent materials, properties, processes and testing and quality. With worked examples, case studies and illustrations throughout, the books will be a key reference for the concrete specialist for years to come. Expert international authorship ensures the series is authoritative Case studies and worked examples help the reader apply their knowledge to practice Comprehensive coverage of the subject gives the reader all the necessary reference material

Based on the Institute of Concrete Technology's advanced course, this new four volume series is a comprehensive educational and reference resource for the concrete materials technologist. An expert international team of authors from research, academia and industry has been brought together to produce this unique reference source. Each volume deals with different aspects of the properties, composition, uses and testing of concrete. With worked examples, case studies and illustrations throughout, this series will be a key reference for the concrete specialist for years to come. Expert international authorship ensures the series is authoritative Case studies and worked examples help the reader apply their knowledge to practice Comprehensive coverage of the subject gives the reader all the necessary reference material

This comprehensive single volume handbook covers every aspect of reinforcement science, from hands-on subjects, such as manual 'lay-up' processing, to theoretical discussions concerning rheology and modeling. Taken from the recently published six volume International Encyclopedia of Composites, this reference volume offers scholarly and practical knowledge of distinguished industry-experts, academics, and government researchers in one accessible and informative handbook. Fibers, processes, and composite reinforcement types, as well as relevant miscellaneous subjects such as property relationships, manufacturing, hybrid reinforcements, and modeling are given detailed treatment. Engineers, materials scientists, and technologists will find the Composite Reinforcement Handbook an invaluable tool.

Offers a comprehensive review of structural topics and helps you prepare successfully for the General Structures and Lateral Forces divisions on NCARB's Architect Registration Examination (ARE). Hundreds of examples, illustrations, and tables enhance the text and 160 multiple-choice practice problems with solutions help you determine areas where you need additional study. This sixth edition is updated to reflect the 2003 International Building Code which is referenced on the exam. The chapters that were updated from the fifth edition are: Ch. 2: Loads on Buildings Ch. 8: Building Code Requirements on Structural Design Ch. 9: some minor changes due to updates reflecting the National Design Specifications for Wood Construction (NDS) 2001. Ch. 13: Lateral Forces--Wind Ch. 14: Lateral Forces--Earthquakes

Sarafino's goal in Principles and Procedures for Modifying Behavior is to create a clear and engaging instrument that describes ways to analyze one's own specific behaviors in terms of the factors that lead to and maintain them and ways to manage those factors to improve the behaviors. The text is based on research, theory, and experiences to explain and provide examples of the concepts and methods of self-management in a comprehensive text. It focuses on topics in applied behavior analysis, behavior modification, behavior therapy, and psychology of learning. Two general topics shaped this text: making the book relative to a variety of fields by describing applications in psychology, education, counseling, nursing, and physical therapy and different academic levels and preparation. Several important objectives guided the content and organization of the text which is designed to cover a large majority of tasks or concepts that the Behavior Analyst Certification Board (www.bacb.com) has identified as the field's essential content and should be mastered by all behavior analysts.
