This book presents a professional course of action for penal investigations of tax fraud in Belgium. A penal tax fraud investigation is usually set up after a report from the Competent Tax Administration, although the police can also start an official investigation by making an official report. The essence of the penal investigation must necessarily concentrate on those essentials from which it can be discerned that the person or company in question is guilty of tax fraud. This must be gathered from the diverse interrogations by the responsible tax officials, the suspects, the accomplices, and the witnesses, and also from the variously obtained information and the analysis of the data gathered. Furthermore, the diversity of taxes (income tax, VAT, registration and inheritance taxes, customs and excise taxes, etc.) and the variety of tax offenses must be taken into account. Penal tax investigations differ from case to case. Each case has it own specification. In spite of these conclusions, it is possible to specify a series of procedures which can be followed in each case of tax fraud investigation. The content of this book is focused on the manner in which a penal tax dossier may be composed and what essentials the penal dossier must contain. Daily cases of tax fraud are treated, rather than the more advanced cases of tax fraud, such as VAT, carousels, and cash fund companies.

"Security sector reform (SSR) is widely recognised as key to conflict prevention, peace-building, sustainable development and democratisation. SSR has gained most practical relevance in the context of post-conflict reconstruction of so-called failed states' and states emerging from violent internal or inter-state conflict. As this volume shows, almost all states need to reform their security sectors to a greater or lesser extent, according to the specific security, political and socio-economic contexts, as well as in response to the new security challenges resulting from globalisation and post-9/11 developments. Contributions from academics and practitioners elaborate on both the conceptual underpinnings and the practical realities of security sector reform and - a crucial aspect of post-conflict peace-building - security sector reconstruction. "

This book-the first to analyze Haiti after the U.S. Occupation--gathers together the most reliable informaion and most comprehensive analysis of Haiti that the U.S. Left has to offer. The Haitian crisis has its roots in colonial times, came of age in the era of gun-boat diplomacy, and exemplified Cold War policy. Its denouement today is paradigmatic of the "new world order." It is therefore essential reading not only for those wanting to gain a deeper understanding of Haiti, but also for anyone trying to grasp the complexities of post-Cold War geopolitics.
