In dem vorliegenden Band werden wieder die Ergebnisse einiger in den Agfa Laboratorien durchgef\u00fchrten Arbeiten mitgeteilt. Die Themen zu diesen Arbeiten sind den verschiedensten Bereichen der photographischen Forschung entnommen, doch sind zwei Gebiete besonders stark ber\u00fccksichtigt worden, welche heute eine hervorragende Rolle spielen. Einmal ist es die Anwendung der Ergebnisse der Halbleiterphysik zur Erkl\u00e4rung des photographischen Elementarprozesses und der Entwicklungsvorg\u00e4nge. An sich ist die photographische Anwendung dieses Zweiges der Physik nicht neu, doch ist er durch neue Forschungsergebnisse und Betrachtungen weisen f\u00fcr die Theorie des photographischen Prozesses in letzter Zeit besonders fruchtbar geworden. Das zweite Thema ist die Anwendung der \u00dcbertragungstheorie und der Informationstheorie auf photographische Probleme. Urspr\u00fcnglich in der elektrischen Nachrichtentechnik entwickelt, wurden diese Disziplinen in steigendem Ma\u00df auf optische und photographische Probleme angewendet. Da die Grundlagen dieser Methoden vielen Lesern unbekannt sind d\u00fcrften, wurden sie in einem l\u00e4ngeren Aufsatz behandelt. Dieser Band ist Herrn Direktor Dr. ALFRED MILLER, dem langj\u00e4hrigen Leiter der Agfa Filmfabrik in Wolfen gewidmet, durch dessen Tatkraft und Erfahrung nach dem Kriege die Filmfabrik in Leverkusen aufgebaut und auf den heutigen Stand gebracht werden konnte. Ihm ist vor allem auch zu danken, da\u00df durch Gr\u00fcndung des Wissenschaftlich-Photographischen Laboratoriums die wissenschaftliche Forschung auf photographischem Gebiet wieder aufgenommen wurde. An den Arbeiten zur Herausgabe des vorliegenden Bandes war Herr Dr. habil. E. KLEIN in starkem Ma\u00df beteiligt. F\u00fcr seine wertvolle Unterst\u00fctzung bin ich ihm zu Dank verpflichtet.

Vor 25 Jahren, im Jahre 1930, erschien der erste Band der "Ver\u00f6ffentlichungen des wissenschaftlichen Zentral-Laboratoriums der photographischen Abteilung Agfa". Mit ihm begann, unter der Redaktion von Herrn Professor Dr. JoHN EGGERT, eine Reihe von Ver\u00f6ffentlichungen, in der die wesentlichsten Forschungsergebnisse des Zentrallaboratoriums der \u00d6ffentlichkeit mitgeteilt wurden. Diese B\u00e4nde haben in steigendem Ma\u00df das Interesse der Fachwelt gefunden und sich einen wichtigen Platz in der photographischen Literatur gesichert. In ihnen spiegelte sich die Entwicklung der Photographie innerhalb eines Jahrzehntes, denn es gibt wohl kaum ein in den drei \u00f6iger Jahren diskutiertes photographisches Problem, welches hier nicht behandelt wurde. Der Ausbruch des Krieges unterbrach das Erscheinen, nachdem Band VI her ausgekommen war. Erst nach Kriegsende wurde die Reihe von der Filmfabrik Wolfen durch die B\u00e4nde VII und VIII fortgesetzt. Die auf westdeutschem Gebiet liegenden Werke der Agfa, die Photopapierfabrik in Leverkusen und das Agfa Camera Werk in M\u00fcnchen verfl\u00fcgten zun\u00e4chst \u00fcber keine Forschungslaboratorien, und wissenschaftliche Arbeiten mu\u00dften in diesen Werken zun\u00e4chst hinter vordringlicheren Aufgaben zur\u00fcckstehen. Es ist vor allem der Initiative von Herrn Generaldirektor Professor Dr. Dr. E. h. ULRICH HABERLAND zu danken, dem der vorliegende Band gewidmet ist, da\u00df der Aufbau in Leverkusen in einer verh\u00e4ltnism\u00e4\u00dfig kurzen Zeit so weit fortgeschritten war, da\u00df auch die Fabrikation photographischer Filme aufgenommen werden konnte. Schlie\u00dflich war es m\u00f6glich, wieder wissenschaftliche Forschungen in Angriff zu nehmen.
