The world soul (Greek: ????? ?????? psychè kósmou; Latin: anima mundi) is, according to several systems of thought, an intrinsic connection between all living things on the planet, which relates to the world in much the same way as the soul is connected to the human body. Plato adhered to this idea and it was an important component of most Neoplatonic systems:

Anima Mundi | Definition of Anima Mundi by Merriam-Webster

WORLD SOUL (ANIMA MUNDI) A principle regarded by some as animating the universe much as the human soul animates man's body. The notion of an organic and living world ruled by spiritual forces rather than by mechanical laws is not peculiar to primitive minds; it is found in the writings of early philosophers.

Anima-Mundi is a contemporary art gallery based in St. Ives, Cornwall. It was founded by Joseph Clarke, who has curated in excess of 100 exhibitions over a twenty year period, working with international artists in all media including painting, sculpture, photography, video, performance and installation art.

This work presents and philosophically analyzes the early modern and modern history of the theory concerning the soul of the world, anima mundi. The initial question of the investigation is why there was a revival of this theory in the time of the early German Romanticism, whereas the concept of the anima mundi had been rejected in the earlier, classical period of European philosophy (early and mature Enlightenment). The presentation and analysis starts from the Leibnizian-Wolffian school, generally hostile to the theory, and covers classical eighteenth-century physico-theology, also reluctant to accept an anima mundi. Next, it discusses early modern and modern Christian philosophical Cabbala (Böhme and Ötinger), an intellectual tradition which to some extent tolerated the idea of a soul of the world. The philosophical relationship between Spinoza and Spinozism on the one hand, and the anima mundi theory on the other is also examined. An analysis of Giordano Bruno's utilization of the concept anima del mondo is the last step before we give an account of how and why German Romanticism, especially Baader and Schelling asserted and applied the theory of the Weltseele. The purpose of the work is to prove that the philosophical insufficiency of a concept of God as an ens extramundanum instigated the Romantics to think an anima mundi that can act as a divine and quasi-infinite intermediary between God and Nature, as a locum tenens of God in physical reality.

The Congress in Kyoto, Japan, was the beginning of a new era in the life of the IAAP: for the first time in its history, this creative and stimulating triennial gathering of Jungian analysts from all over the world took place in Asia. And with it, scientific and cultural dialogue between Jungians from 'West' and 'East' enters a new dimension. As is evident in these pages, there are ever more mutually enriching developments emerging: both in theory and in clinical work, from culturally – and often, politically – different points of view.

From Plato's Timaeus onwards, the world or cosmos has been conceived of as a living, rational organism. Most notably in German Idealism, philosophers still talked of a 'Weltseele' (Schelling) or 'Weltgeist' (Hegel). This volume is the first collection of essays on the origin of the notion of the world soul (anima mundi) in Antiquity and beyond. It contains 14 original contributions by specialists in the field of ancient philosophy, the Platonic tradition and the history of theology. The topics range from the 'obscure' Presocratic Heraclitus, to Plato and his ancient readers in Middle and Neoplatonism (including the Stoics), to the reception of the idea of a world soul in the history of natural science. A general introduction highlights the fundamental steps in the development of the Platonic notion throughout late Antiquity and early Christian philosophy. Accessible to Classicists, historians of philosophy, theologians and invaluable to specialists in ancient philosophy, the book provides an overview of the fascinating discussions surrounding a conception that had a long-lasting effect on the history of Western thought.

Mark Ryden's paintings instantly trigger a warped déjà vu. His work recalls a parallel universe of 1950s Golden Books and the whimsy of Lewis Carroll. His cheery bunnies, rendered in the glowing hues of children's books, are likely to be carving slabs of meat rather than frolicking in the forest. Ryden's work mingles superb technique with outre images to create a world of strange and disturbing beauty.
