DIGITAL CITIES ROADMAP This book details applications of technology to efficient digital city infrastructure and its planning, including smart buildings. Rapid urbanization, demographic changes, environmental changes, and new technologies are changing the views of urban leaders on sustainability, as well as creating and providing public services to tackle these new dynamics. Sustainable development is an objective by which the processes of planning, implementing projects, and development is aimed at meeting the needs of modern communities without compromising the potential of future generations. The advent of Smart Cities is the answer to these problems. Digital Cities Roadmap provides an in-depth analysis of design technologies that lay a solid foundation for sustainable buildings. The book also highlights smart automation technologies that help save energy, as well as various performance indicators needed to make construction easier. The book aims to create a strong research community, to have a deep understanding and the latest knowledge in the field of energy and comfort, to offer solid ideas in the nearby future for sustainable and resilient buildings. These buildings will help the city grow as a smart city. The smart city has also a focus on low energy consumption, renewable energy, and a small carbon footprint. Audience The information provided in this book will be of value to researchers, academicians and industry professionals interested in IoT-based architecture and sustainable buildings, energy efficiency and various tools and methods used to develop green technologies for construction in smart cities.

Pandit Deendayal Upadhyaya is well-known for his holistic philosophy of ‘Integral Humanism’ and the supreme challenge of today; is to convert his ideological-base to actual practice. The key objective of Integral Humanism is to develop an indigenous economic model, based on Bharatiya culture, to solve the problems faced by India. An indigenous economic operating system, with Dharma as its central pillar, is the need of the hour so that India will emerge as the strongest economy of the world in a purely ethical manner. Here in this book the authors try to propose such a developmental strategy by blending Blockchain technologies with Integral Humanism.
