Chapter 2 Literature Review 1
CHAPTER 2: Literature Review. This chapter will explore the literature that is relevant to understanding the development of, and interpreting the results of this convergent study. The first two parts of this review of the literature will describe two types of research: research on teaching and research on teachers' conceptions.

CHAPTER 2: Literature Review
2.1 Overview of information Because a literature review is a summary and analysis of the relevant publications on a topic, we first have to understand what is meant by 'the literature'. In this case, 'the literature' is a collection of all of the relevant written sources on a topic. It will include both theoretical and empirical works.

Chapter 2: What is a Literature Review? – Literature ...
CHAPTER 2 LITERATURE REVIEW 2.1 Introduction This chapter attempts to review the relevant literature and research related to the antecedents that influence consumers' decision on function (healthy) food purchase. The chapter first discusses the definition of functional foods, then followed by consumer behavior on function (healthy) food.

CHAPTER 2 LITERATURE REVIEW 2.1 Introduction
CHAPTER 2 2 LITERATURE REVIEW 2.1 Introduction This chapter provides an overview of previous research on knowledge sharing and intranets. It introduces the framework for the case study that comprises the main focus of the research described in this thesis. It is important to set the context of the literature review work by first providing:

CHAPTER 2 REVIEW OF LITERATURE 2.1. Lactic acid bacteria Lactic acid bacteria (LAB) are group of Gram-positive bacteria that are devoid of cytochromes and preferring anaerobic conditions, fastidious, acid-tolerant and strictly fermentative. They are usually non-motile and non-sporulating bacteria that produce lactic acid. This bacterial group

A perennial bestseller since 1997, this updated tenth edition of Understanding Research Methods provides a detailed overview of all the important concepts traditionally covered in a research methods class. It covers the principles of both qualitative and quantitative research, and how to interpret statistics without computations, so is suitable for all students regardless of their math background. The book is organized so that each concept is treated independently and can be used in any order without resulting in gaps in knowledge—allowing it to be easily and precisely adapted to any course. It uses lively examples on contemporary topics to stimulate students' interest, and engages them by showing the relevance of research methods to their everyday lives. Numerous case studies and end-of-section exercises help students master the material and encourage classroom discussion. The text is divided into short, independent topic sections, making it easy for you to adapt the material to your own teaching needs and customize assignments to the aspect of qualitative or quantitative methods under study—helping to improve students' comprehension and retention of difficult concepts. Additional online PowerPoint slides and test bank questions make this a complete resource for introducing students to research methods. New to this edition: New topic section on design decisions in research Additional material on production of knowledge and research methods Significant development of material on ethical considerations in research Fresh and contemporary examples from a wide variety of real, published research Topic-specific exercises at the end of each section now include suggestions for further steps researchers can take as they build their research project.

Dr. Raghu Korrapati's newest book is a seminal work that is bound to be soon accepted as a significant and powerful contribution to the literature on higher education. This is his landmark effort to encapsulate in one place all that a research scholar might need during his/her research, be it on any subject or discipline. The result is a complex and nuanced picture of the nature, processes, and contexts of research scholarship in varied departmental, disciplinary and institutional cultures. Undoubtedly, this pivotal and pioneering book will prove to be valuable to both faculty and graduate students who study higher education. Further, institutional leaders, deans, and chairpersons of tenure, and promotion committees who seek to develop vaster comprehension of scholarship will also greatly benefit from this. The book is divided into 5 chapters – Introduction, Literature Review, Methodology, Results, and Summary, Conclusions, & Further Review – to provide insights and suggestions on every aspect of research based work and to assist you stay focused on doing the right things. I hope you will find your " new research guide" helpful in guiding you through this learning and exciting phase of your life. My expectation is that you will continue to learn and share the knowledge for the next generations of scholars and researchers.

This book is about how to implement creative competition within an organization. It examines the conditions under which internal competition can promote knowledge acquisition and knowledge sharing. The book describes a number of studies of sales departments in Japanese firms. Sales departments in Japanese firms were studied because internal competition is getting fiercer in these departments following the recent introduction of performance-based compensation. Exploratory case studies of ORIX Corporation and Japan Computer were conducted in order to generate research hypotheses. To gather quantitative data and test the hypotheses drawn from the case studies, a questionnaire survey of sales departments of Japanese firms listed on the Tokyo Stock Exchange was carried out. The findings reported in the book shed new light not only on internal competition theory, but also provide new insights into the theories on knowledge creation and intra-organizational conflict.

This thesis will discuss if the intimate interpersonal intercourses between Taiwan and Japan, such as, especially, Japanese's sightseeing in Tainan, the calls on public authorities, the exchanges between private sectors, marriages with Tainan people, working in Tainan log stay, etc., will create the need for local Japanese-speaking volunteers. Based on my professional experience in the exchanges between Japanese in the local government, and taking public authorities in Tainan, private sectors, the public, Japanese educators and learners, Japanese visiting Tainan as objects of study, I will discuss the importance and prospect of the cultivation of Japanese-speaking volunteers through this research. The contents will be divided into 6 chapters:Chapter 1: Preface, specifying the motivation, the purpose, the scope and the methodology of research. Chapter 2: Literature Review, discussion on the definition of Japanese-speaking volunteers, the ones born in Japan and the ones born in Taiwan. Chapter 3: Introduction of the exchange situations between Japanese in Tainan, the cultivation of volunteers, the courses of volunteer training programs, and the problems of cultivating Japanese-speaking volunteers. Chapter 4: Survey, a look into the opinions of people of all circles about Japanese-speaking volunteers. Chapter 5: Analysis, based on the survey of Chapter 4, of the qualifications of Japanese-speaking volunteers, the assistances governmental authorities should supply, the prospect of cultivating Japanese-speaking volunteers. Chapter 6: Conclusion, including the summary and the issues we may face in the future. With this research, I hope to provide reference materials to the related policies and practical works in the cultivation of Japanese-speaking volunteers when government authorities or private sectors are promoting the exchanges between Japan.

The dissertation process is one of endurance, willpower, and patience. To simplify the journey for today's graduate students, The Dissertation Desk Reference harvests the components that consistently appear in dissertations, with a separate entry for each component. Each entry includes a comprehensive example taken directly from a high-quality dissertation accompanied by a note describing what the researcher did. This book is user-friendly for doctoral students and their faculty advisors.

The overarching aim of this study is to analyse what researchers in South African higher education institutes and science councils mean by the term 'utilisation' ? i.e. what do researchers mean when they indicate that their research findings are being utilised. The data used to conduct this analysis is taken from a national survey, conducted for the purpose of establishing the extent to which research finding in South Africa are utilised. The author played an active role in this survey component of the research conducted for the South African National Advisory Committee on Innovation (NACI). The study also covers the specific dynamics of the utilisation process: How does research utilisation occur and what are the key variables in this process? In answering this question, the author discusses five prominent models of knowledge utilisation that have been put forward over the past three decades: The Two-Communities theory of Norman Caplan (1979); The three models of policy research of Carol Weiss (1991); The Triple Helix model of Henry Etzkowitz and Loet Leydesdorff (1996); The three policy paradigms of Barry Bozeman (1994); and The Contingency Effectiveness model of Technology Transfer (CETT) of Barry Bozeman (2000).

A three-level (B1+ to C1) integrated skills course for higher education students at university or on foundation courses. The C1 Advanced Student's Book consolidates academic study skills. Students' analytical skills are challenged with an increased range of authentic written and spoken academic texts. From essay organisation, taking notes, group discussion to writing references and paraphrasing texts, the students are presented with a wealth of practice opportunities to enhance all academic skills at this level. The course further develops independent learning skills and critical thinking through 'Study tips' sections and allows for personalisation of learning in the 'Focus on your subject' sections. Lecture and seminar skills units provide authentic practice in listening to lectures and participating in seminars.

Inhaltsangabe:Introduction: Over the last two decades, real options analysis (ROA) has become a fundamental part of project evaluation. Its increasing use in academia and corporations as well as its application to a wide range of industries make it a valuable tool in finance and accounting departments around the world. Classical capital budgeting approaches like net present value (NPV) techniques do not account for additional flexibility and are therefore a very static measurement. In addition to this, a further core factor is the strategic aspect of the investment decision. Companies often make decisions according to strategic reasons. This raises the question of how the bargaining power is divided between a seller and a buyer. Furthermore, the influence of the hold-up problem on the two involved players is analyzed. Finally, the trade surplus of the investment is divided between the seller on the one hand and the buyer on the other hand using a game theoretic approach to model this relationship. The airline industry is examined in this paper as it offers many possibilities to apply and explain the concepts of real options and bargaining in bilateral negotiations. This paper sets out to analyze the value of flexibility of an investment decision and discusses, in a second step, how the strategic power between the two parties involved is allocated. In academic literature, limited research has been done to find out about the combination of a real options analysis and the distribution of the trade surplus between the different players involved. This presents the following questions: Does an option in terms of the purchase of an aircraft have additional value in comparison to a classical and inflexible buy now decision for an airline? If this is the case, how much is this value worth and how is the trade surplus distributed between the two parties involved? Are there any hold-up problems? The following chapters will examine and answer these issues. Chapter two deals with a literature review on standard real options analysis in general and the airline sector in particular. In chapter three, background information about the airline industry is given and it is stressed why this sector is used for the capital budgeting approach. Chapter four covers the methodology that is used in chapter five. In this chapter, a case study involving the purchase decision of an aircraft is discussed using different methods to analyze the commit-now and purchase [...]

'I highly recommend Diana Ridley's book. One of its great strengths is its relevance to all students in Higher Education required to undertake a literature review. A sense of security prevailed in the presence of the author's uncomplicated writing style and pages rightly divided into manageable chunks...[This book] lives up to its claim to contain extensive practical tips on how to prepare, organise and write a successful literature review' - ESCalate Review The Literature Review is a concise step-by-step guide to conducting a literature search and writing up the literature review chapter in Masters dissertations and in Ph.D. and professional doctorate theses. Diana Ridley describes how to carry out a literature review in a systematic, methodical way, providing useful strategies for efficient reading, conducting searches, organising information and writing the review itself. Examples of best and worst practice drawn from real literature reviews are included throughout to demonstrate how the guidance can be put into practice. This is an accessible, pragmatic and highly practical resource that will be welcomed by postgraduate students of any discipline.

TRB's Transit Cooperative Research Program (TCRP) Report 71, Volume 7: Guidelines for Guard/Restraining Rail Installation explores two guard rail installation philosophies and the effects of vehicle types, wheel flange angle, wheel/rail friction coefficient, curve radius, cant deficiency, and track perturbation on flange climb derailments.
