TRB's Airport Cooperative Research Program (ACRP) Report 25, Airport Passenger Terminal Planning and Design comprises a guidebook, spreadsheet models, and a user's guide in two volumes and a CD-ROM intended to provide guidance in planning and developing airport passenger terminals and to assist users in analyzing common issues related to airport terminal planning and design. Volume 1 of ACRP Report 25 explores the passenger terminal planning process and provides, in a single reference document, the important criteria and requirements needed to help address emerging trends and develop potential solutions for airport passenger terminals. Volume 1 addresses the airside, terminal building, and landside components of the terminal complex. Volume 2 of ACRP Report 25 consists of a CD-ROM containing 11 spreadsheet models, which include practical learning exercises and several airport-specific sample data sets to assist users in determining appropriate model inputs for their situations, and a user's guide to assist the user in the correct use of each model. The models on the CD-ROM include such aspects of terminal planning as design hour determination, gate demand, check-in and passenger and baggage screening, which require complex analyses to support planning decisions. The CD-ROM is also available for download from TRB's website as an ISO Image.

Beim Betrieb eines Flugzeugs sind viele Parameter, Vorschriften und Einfl üsse zu beachten. Von großer Bedeutung ist die Flugleistung, die die Anforderungen an das technische Leistungsverm ögen f ü r bestimmte Aufgaben beschreibt. Ausgehend von aerodynamischen Gegebenheiten und beh ördlichen Vorschriften stellt der Autor die wirtschaftlichen und flugbetrieblich relevanten Fragen f ü r die einzelnen Flugphasen anhand praktischer Beispiele dar. Sein Buch wendet sich an Piloten, Ingenieure und Flugsch üler und verzichtet auf eine akademische Sichtweise.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.
