In this thesis, we discuss an important issue in computational linguistics: distinguishing between formal and informal style of texts, in document classification and in text generation. There is a need to identify formal texts and informal texts automatically. In addition, there is a need of having a computer system that could generate correct English texts in formal or informal style. Therefore, we propose to use two main techniques in order to solve the two tasks. The first technique is to build a model that can be used to classify any text or sentence as having formal or informal style. The second technique is based on natural language generation (NLG) and it generates correct English sentences with formal or informal style. In order to achieve our goals, we start by studying the main differences between formal and informal style and summarize their characteristics. In addition, we manually collect parallel lists of formal versus informal words, phrases, and expressions from different sources that will be used for our proposed work. Then, we build our model for the classification task by using machine learning technique in order to classify texts and sentences into formal and informal style. The evaluation results show that our model is able to predict a class of formal/informal for any text or sentence with high accuracy. After that, we build our system that can generate formal and informal sentences by using NLG techniques. The evaluation results on a sample of generated sentences show that our NLG system can produce high-quality sentences in formal or informal style. The main contribution of this work consists in designing a set of features that led to good results for both tasks: text classification and text generation with different formality levels.

What are "Informal Words?" Informal Words are connected with normal communication to your colleagues, acquaintances, family members, etc. Informal words are more common in speech than in writing. Informal words are used in the 'unofficial' language. These words are not used in 'official' or formal writing. This book covers around 1400 Informal words (including the name of parts of speech they belong to) and their meanings NOTE: Many informal words are used in both American and British English in the same way. However, some informal words are particularly used in American English only. Similarly, some informal words are particularly used in British English only. As in the ever-changing English language, Brazilian Portuguese is colorful and equally as fluid in its 'giria', or slang (from the simply conversational to the vulgar) - and advanced students are often only exposed to the formal or classic literary forms of the language. A Dictionary of Informal Brazilian Portuguese, originally published in 1983, remains a profitable reference tool to help bridge the gap between the classroom, the streets, and the contemporary literature of Brazil. Beyond students and researchers, this dictionary, containing over 7,500 Brazilian expressions, will be invaluable to travelers, businesspeople, translators, and others who are seeking insight into the rich nuances of informal Brazilian Portuguese. Enhanced often with Portuguese sentences to place the words or phrases in context, this dictionary will reward the reader with the colorful inventiveness of the language - and this is not 'bafu-de-boca' (hot air!).

This groundbreaking undergraduate textbook on modern Standard English grammar is the first to be based on the revolutionary advances of the authors' previous work, The Cambridge Grammar of the English Language (2002). The analyses defended there are outlined here more briefly, in an engagingly accessible and informal style. Errors of the older tradition of English grammar are noted and corrected, and the excesses of prescriptive usage manuals are firmly rebutted in specially highlighted notes that explain what older authorities have called 'incorrect' and show why those authorities are mistaken. This book is intended for students in colleges or universities who have little or no previous background in grammar, and presupposes no linguistics. It contains exercises, and will provide a basis for introductions to grammar and courses on the structure of English not only in linguistics departments but also in English language and literature departments and schools of education.
