NOTE: Volvo vehicles do not require a formal reset procedure for any of the TPM system functions. Tire pressure sensor IDs are automatically programmed while driving. CAUTION: When inflating tires with TPMS valves, press the pump ' s mouthpiece straight onto the valve to help avoid bending or otherwise damaging the valve.

Few would dispute the power of climate change to lead to profoundly destructive weather events. At the same time, the possibility of climate change as a consequence—or even a cause—of criminal events is far less recognized. As the earth grows warmer, issues regarding land use, water rights, bio-security, and food production and distribution will continue to have far-reaching impact, and produce more opportunity for offenses by individuals and groups as well as political and corporate entities. In Climate Change from a Criminological Perspective, a panel of pioneering green criminologists investigates an increasingly complex chain of ecological causes and effects. Illegal acts are analyzed as they contribute to environmental decline (e.g., wildlife poaching) or result from ecological distress (e.g., survival-related theft). Regulatory and other interventions are critiqued, concepts of environmental harm refined, and new research methodologies called for. And while individual events described are mainly local, the contributors keep the global picture, and substantial questions about human rights and social relationships, firmly in mind. Topics featured include: Global warming as corporate crime. Climate change and the courts: U.S. and global views. Climate change, natural disasters, and gender inequality. The roles and responsibilities of environmental enforcement networks. A socio-cultural perspective on climate change denial. PLUS: instructive in-depth chapters on criminological aspects of Hurricane Katrina and the Japanese nuclear disaster. A volume of considerable timeliness and vision, Climate Change from a Criminological Perspective will be read and discussed, and will inspire action, by researchers in criminology, criminal justice, environmental studies, and related disciplines, as well as policymakers.

For the world's leading car-makers, the early 1990s brought radical changes. The reports published by MIT shocked management in European and American industries. Former major companies had to face consequences no one had expected. The assembly-lines were reorganized in order to achieve higher quality at lower costs. Five years after the MIT report, this book poses the question: What are the results of this revolution in work organization? Scientists and practitioners, many of them involved in earlier reports, evaluate the changes to the automotive industry in Europe and Japan. An insight into recent concepts in automation and the organization of production.

"Spurred by a desire to travel the world, Ezra Cantrell joined the Foreign Service and saw it all- Thousand islands of Indonesia, soaring minarets in Kyrgyzstan, Uzbekistan's bulbous blue domes, and many pleasant tree-filled city streets around the world. His journeys traversed the continents casting a spell on any traveler's imagination. Along with Sacha his Indonesian spouse, their magical journey is a measure for adventure. And then the ragged wounds of life strike Sacha with an emotional disorder and strip her of a fulfilling life experience. Her obsessive ritual is matched only by the lecherous fetish of a French diplomat who falls in love with her nineteen-year-old daughter. The mishmash adds a disquieting twist to an already sick family dynamic. Lost in the shuffle, Sacha struggles as she trails her husband on international assignments. With each move she starts again in a different city. Ezra finds solace from the family turmoil, as he escapes on assignments and soon experiments with his sexual curiosity. Tormented by his secret desires, he struggles to stave off the gremlins. Along comes a sociopath brimming with wicked desires who spews a disturbing shroud over an American university campus. A delusional love affair sprouts, a bruised ego ruptures and a sick obsession with a sadistic bent is unleashed with dreadful outcomes. What appears to be isolated slayings soon turn into the handiwork of a deviant mind setting off an intercontinental jealous rage that chills the mind in this fictional drama"--T.p. verso.

This book chronicles the divergent growth trends in car production in Belgium and Spain. It delves into how European integration, high wages, and the demise of GM and Ford led to plant closings in Belgium. Next, it investigates how lower wages and the expansion strategies of Western European automakers stimulated expansion in the Spanish auto industry. Finally, it offers three alternate scenarios regarding how further EU expansion and Brexit may potentially reshape the geographic footprint of European car production over the next ten years. In sum, this book utilizes history to help expand the knowledge of scholars and policymakers regarding how European integration and Brexit may impact future auto industry investment for all EU nations.
