A look at the German High Command during World War II challenges the myth that the German Generals could have won the war had Hitler not interfered, and maps out the history and the personalities of the German Command Structure.

Four friends, all graduates of Hampton Institute, keep a collective journal they call "If This World Were Mine," and share their personal diaries each month at a gathering filled with humor, gossip, and affirmation. The four group members are as different as the seasons, yet they all share a love of one another. Yolanda, a media consultant, keeps it going on with a no-nonsense attitude and independence that are balanced by the theatrics of Riley, a former marketing executive whose marriage has reduced her to a "kept woman with kids." Computer engineer Dwight's anger at the world is offset by the compassion of Leland, a gay psychiatrist whose clients make him question why God ever invented sex. But after five years, the once-strong bonds of friendship are weakening, and the group must handle challenges of work, lost love, and a stranger in their midst. As the group members confront their true feelings toward each other, resentments and long-held secrets surface, and the stability of the group begins to disintegrate. Is their past friendship strong enough to survive the future?

Note: The IBM TS7700 Release 4.0 Guide, SG24-8366 is available at: http://www.redbooks.ibm.com/abstracts/sg248366.html IBM\u2122 TS7700 is a family of mainframe virtual tape solutions that optimize data protection and business continuance for IBM z SystemsTM data. Through the use of virtualization and disk cache, the TS7700 family operates at disk speeds while maintaining compatibility with existing tape operations. Its fully integrated tiered storage hierarchy takes advantage of both disk and tape technologies to deliver performance for active data and best economics for inactive and archive data. This IBM Redbooks\u2122 publication describes the TS7700 R3.3 architecture, planning, migration, implementation, and operations. The latest TS7700 family of z Systems tape virtualization is offered as two models: IBM TS7720 features encryption-capable high-capacity cache that uses 3 TB SAS disk drives with RAID 6, which can scale to large capacities with the highest level of data protection. IBM TS7740 features encryption-capable 600 GB SAS drives with RAID 6 protection. Both models write data by policy to physical tape through attachment to high-capacity, high-performance IBM TS1150 and earlier IBM 3592 model tape drives that are installed in IBM TS3500 tape libraries. Physical tape support is optional on TS7720. TS7700 R3.3 also supports external key management for disk-based encryption by using IBM Security Key Lifecycle Manager. This book intended for system architects who want to integrate their storage systems for smoother operation.

A national gathering of federal agents leads to a surprising, and sexy, turn of events when two women who helped each other survive training share a room and discover their feelings go way beyond the boundaries of friendship.
