It's true that state standards often have way too much content and aren't written in a way that enhances classroom instruction and formative assessment. That's why this guide is invaluable for any educator who wants to ensure that standards actually lead to higher student achievement. The authors give you good reasons for why some content standards should be dropped and explain how benchmark statements in standards should be rewritten. Learn how to sequence content and set up grading scales that help facilitate formative assessment and effective instruction. And get clear steps for unpacking and converting standards into guidelines that are much more useful to classroom teachers. To implement this book's much more efficient approach, the authors included over 240 pages of detailed scoring scales and sample measurement topics for k-8 science, math, language arts, social studies, and critical life skills topics for elementary through high school students.

Here's a fun and easy way to help learners understand and remember comprehension strategies! Making Comprehension Connections: Look, Listen, and Link! effectively combines the senses for greater academic success by providing everything the brain needs for comprehension and memory retention-visual, verbal, auditory, and kinesthetic input. This easy-to-follow program provides colorful and simple icons in the form of posters that help learners remember concepts without the help of words. It also provides learners with multiple ways to remember and understand the comprehension skills and strategies, using songs and other active learning experiences. The songs are featured on an Audio CD and provided in print form in the Teacher's Guide and on transparencies. A separate Teacher Resource CD contains all of the reproducibles and a professional development DVD is also included that shows how to implement the lessons. This resource is correlated to the Common Core State Standards.

Learning to Solve Problems is a much-needed book that describes models for designing interactive learning environments to support how to learn and solve different kinds of problems. Using a research-based approach, author David H. Jonassen—a recognized expert in the field—shows how to design instruction to support three kinds of problems: story problems, troubleshooting, and case and policy analysis problems. Filled with models and job aids, this book describes different approaches for representing problems to learners and includes information about technology-based tools that can help learners mentally represent problems for themselves. Jonassen also explores methods for associating different solutions to problems and discusses various processes for reflecting on the problem solving process. Learning to Solve Problems also includes three methods for assessing problem-solving skills: performance assessment, component skills; and argumentation.

How can teachers get great answers to open-ended comprehension questions from the students who need help the most? K-3, ELL, and struggling older students. Nancy Boyles supplies the solution. She begins with the foundations of a great answer—great objectives, books, instruction, and discussions—and adds valuable guidance on assessment. Her ready-to-go student scaffolds then break down the National Assessment of Educational Progress (NAEP) objectives into 40 specific, measurable, open-ended comprehension questions that can be correlated with the literacy objectives of any state. Each question includes: teaching tips; a bibliography of fiction/nonfiction picture books aligned with the question; a worksheet with the reading and writing strategy; and an answer frame scaffold for initial response practice. Included CD has scaffolds and an extensive master bibliography organized alphabetically that matches key fiction/nonfiction literature models with appropriate comprehension questions.

This essential text and practitioner guide is unique in its emphasis on fostering academic learning as well as life skills.
