Learn about cell function, prokaryotes and eukaryotes, mitosis and meiosis, organelles in plant and animal cells, and mor with this high-interest nonfiction title! This 6-Pack provides five days of standards-based activities that will engage fifth grade students, support STEM education, and build content-area literacy in life science. It includes vibrant images, fun facts, helpful diagrams, and text features such as a glossary and index. The hands-on Think Like a Scientist lab activity aligns with Next Generation Science Standards (NGSS). The accompanying 5E lesson plan incorporates writing to increase overall comprehension and concept development and features: Step-by-step instructions with before-, during-, and after-reading strategies; Introductory activities to develop academic vocabulary; Learning objectives, materials lists, and answer key; Science safety contract for students and parents

Written by experienced teacher Pauline Lowrie, this Student Guide for Biology: - Helps students identify what they need to know with a concise summary of the topics examined in the AS and A-level specifications - Consolidates understanding with tips and knowledge check questions - Provides opportunities to improve exam technique with sample answers to exam-style questions - Develops independent learning and research skills - Provides the content for generating individual revision notes

Connect students in grades 4 and up with science using Learning about DNA. This 48-page book covers topics such as DNA basics, microscopes, the organization of the cell, mitosis and meiosis, and dominant and recessive traits. It reinforces lessons supporting the use of scientific process skills to observe, analyze, debate, and report, and each principle is supplemented by worksheets, puzzles, a research project, a unit test, and a vocabulary list. The book also includes an answer key.

\*\*This is the chapter slice "Single-Celled and Multicellular Organisms" from the full lesson plan "Cells"\*\*. Cells are the building blocks of life. We take you from the parts of plant and animal cells and what they do to single-celled and multi-cellular organisms. Using simplified language and vocabulary concepts we discover human cell reproduction as well as diffusion and osmosis. Our resource provides ready-to-use information and activities for remedial students using simplified language and vocabulary. Ready to use reading passages, student activities and color mini posters. our resource is effective for a whole-class, small group and independent work. All of our content meets the Common Core State Standards and are written to Bloom's Taxonomy and STEM initiatives.

Start your journey into the human body with cells, bones and muscles. Our resource takes you through a fascinating study of anatomy with current information. Begin with cells, the building blocks of life. Build your own cell by sculpting the different parts. Move into tissues, organs and systems to discover all the different systems that make the human body function. Next is the skeletal system. Invent your own alien skeleton using the different bones found in the human body. Understand that these bones are held together with joints and cartilage. Finally, end this part of the journey with the muscular system. Find out the difference between skeletal, smooth and cardiac muscles before identifying voluntary and involuntary muscle movement. Aligned to the Next Generation State Standards and written to Bloom's Taxonomy and STEAM initiatives, additional hands-on experiments, crossword, word search, comprehension quiz and answer key are also included.
