most powerfully integrated application for compositing and creating motion graphics as well as visual effects, and with the help of this all-inclusive book, you can do all skill level works what the professional graphic designers, animators, and visual artists do. In Combustion, whether the old version Combustion 4 or the newest Combustion 2008, you can do all kinds of editing with videos as you do with still images in Photoshop. This manual empowers you to get started by creating simple composites, using operators in composite, changing the speed of an action in a clip, and editing clips and adding transition effects. It also gets you acquainted with a vast array of Paint features by showing practical examples with the pictures of every move and final results in form of videos. You will also

learn about some basic compositing, such as animating using keyframes, controlling layers and changing properties, and using channels, mattes, masks, null objects, lights, and camera. Tracking and stabilizing, keying and color correcting, and nesting composites are also explained in this book. It also covers warping and morphing techniques, creating particle effects, expressions, and capsules, and how to build G-Buffers. So if you are interested in editing movies, games, earning a way to Hollywood, or impressing your loved one, Combustion can serve all your purposes, as it does all the works of this kind. The lessons conceived and prepared by us will let you start learning from real basic making your move amazing, astonishing, and exhilarating for you. It's cool, simple,
