This volume constitutes the refereed proceedings of the Third International Conference on HCI in Business, Government and Organizations, HCIBGO 2016, held as part of the 18th International Conference on Human-Computer Interaction, HCII 2016, which took place in Toronto, Canada, in July 2016. HCII 2016 received a total of 4354 submissions, of which 1287 papers were accepted for publication after a careful reviewing process. The 43 papers presented in this volume were organized in topical sections named: designing information systems; HCI in the public administration and government; HCI at work; and mobile applications and services.

This book focuses on computational modeling and simulation research that advances the current state-of-the-art regarding human factors in simulation and applied digital human modeling. It reports on cutting-edge simulators such as virtual and augmented reality, on multisensory environments, and on modeling and simulation methods used in various applications, such as surgery, military operations, occupational safety, sports training, education, transportation and robotics. Based on the AHFE 2017 International Conference on Human Factors in Simulation and Modeling, held on July 17 – 21, 2017, in Los Angeles, California, USA, the book is intended as a timely reference guide for researchers and practitioners developing new modeling

and simulation tools for analyzing or improving human performance. It also offers a unique resource for modelers seeking insights into human factors research and more feasible and reliable computational tools to foster advances in this exciting research field.

GameAxis Unwired is a magazine dedicated to bring you the latest news, previews, reviews and events around the world and close to you. Every month rain or shine, our team of dedicated editors (and hardcore gamers!) put themselves in the line of fire to bring you news, previews and other things you will want to know.

Defining Sport Communication is a comprehensive resource addressing core topics and issues, including humanistic, organizational, relational, and mediated approaches to the study of sport communication. It provides foundational work in sport communication for students and scholars, reflecting the abundance of research published in recent years and the ever-increasing interest in this area of study. Bringing together scholars from various epistemological viewpoints within communication, this volume provides a unique opportunity for defining the breadth and depth of sport communication research. It will serve as a seminal reference for existing scholarship while also providing an agenda for future research.

Applications of microcomputer graphics. Display generation basics. Working with display generation hardware. An introduction to peripheral graphics devices. Interactive design elements and intelligence. Design and simulation system interaction. Mathematics and transforms for advanced graphics. High-performance graphics and animation. Business graphics. Foreign and domestic television data. Graphics on the Apple II microcomputer. Graphics on the IBM personal computer.

This book constitutes the refereed proceedings of the 6th bi-annual Latin American Conference on Human-Computer Interaction, CLIHC 2013, held in Guanacasta, Costa Rica, in December 2013. The 11 full papers and 14 short papers were carefully reviewed and selected from 32 submissions. The papers address all current topics in HCI such as: cultural issues, assistive technologies, usability, accessibility, multimodal inter-faces, design issues, HCI education, and visualization and evaluation techniques, among others.

*Shows how to create realistic action games without assuming college-level Physics (which the majority of gamers won't have); includes necessary physics and mathematics *Ideal for all budding games programmers, with example code in Java, C#, and C *Complements Apress's platform-specific gaming books, like Advanced Java Games Programming and Beginning .NET Games Programming with C#, and the forthcoming Beginning .NET Games Programming in VB.NET *Palmer has strong
