After decades of research, world-renowned Stanford University psychologist Carol S. Dweck, Ph.D., discovered a simple but groundbreaking idea: the power of mindset.

Reveals how established attitudes affect all aspects of one's life, explains the differences between fixed and growth mindsets, and stresses the need to be open to change in order to achieve fulfillment and success.

World-renowned Stanford University psychologist Carol Dweck, in decades of research on achievement and success, has discovered a truly groundbreaking idea-the power of our mindset. Dweck explains why it's not just our abilities and talent that bring us success-but whether we approach them with a fixed or growth mindset. She makes clear why praising intelligence and ability doesn't foster self-esteem and lead to accomplishment, but may actually jeopardize success. With the right mindset, we can motivate our kids and help them to raise their grades, as well as reach our own goals-personal and professional. Dweck reveals what all great parents, teachers, CEOs, and athletes already know: how a simple idea about the brain can create a love of learning and a resilience that is the basis of great accomplishment in every area.

After more than 20 years of study on how an individual's mindset motivates success, Dweck shows how these mindsets profoundly shape achievements and relationships, and how a mindset can be applied to achieve success.
