The world today is in the period of yuga-sandhi -the junction of two world ages that marks the historical transformation from one dharmic world to another. Yuga-sandhi is the period of stress, turmoil and general degeneration which is very evident today all around us. Interestingly, sages and prophets of ancient ages had the vision to predict many notable developments in current history. Nostradamus' prophecies are more widely known-but even the predictions of Indian sages are equally impressive, notably those of Vira Brahmendra Yogi, a contemporary of Nostradamus. Dr. N.S. Rajaram is a mathematician, linguist and historian who spent more than twenty years in the U.S. as a researcher at several universities and high technology organizations including NASA. For the last ten years he has been an independent researcher and author working on ancient civilizations, especially Vedic and Harappan India. He is the author of the acclaimed book Vedic Aryans and the Origins of Civilization (with David Frawley), which is now in its third edition. He is also the author of The Deciphered Indus Script (with N. Jha) on the decipherment of the 5000-year old Indus Script. He has deciphered the more than 5000-year old 'world's oldest writing' showing it to be related to the Rigveda . He is the author of more than ten books on history and civilization and world religions. He is also the founder of Banglore-based cultural foundation Naimisha Research Foundation which has held several path breaking programs that have become internationally known.

Since ancient times, fascinating individuals have claimed the power to peer into the beyond using everything from crystal balls, trances, and messages from God to ancient spirits and the stars.

Stagnate as a 'creepy caterpillar' or transform into a 'beauteous butterfly'-this path-breaking book of a rare genre suggests-is the seminal choice before mankind, and every one of us. In this setting, the book raises some fundamental questions: What is man's rightful place in the cosmos and his manifest destiny on earth? Why are we so self-righteously self-destructive? Are we a doomed species? Or 'divine' beings struggling to overcome the hubris of the human intellect? Is God getting weary of mankind? How should we synergize human effort and Divine Grace? The book posits that any betterment in human behavior needs a cathartic change at the deepest levels. That requires diluting the dominance of the mind and reawakening the long-dormant intelligence of the human heart. To meet that challenge, we need minimum numbers, a 'critical mass' to create self-sustained momentum for transformation through consciousness change. And every single human of this generation should behave in such a way that he or she is that single person whose transformation could make the decisive species-scale difference. The book offers a menu of ideas and an agenda of action. This book could be itself become an input to mobilize that very 'critical mass' it advocates for human transformation. Well-planned and cohesively written, the book is noteworthy for its delightful blend of information and arguments, and reveals the

Published in the early days of World War II, this is partially a biography of Nostradamus, partially a historical novelization of incidents in his life, and an attempt to associate his predictions with historical and future events. McCann is at his best in the former parts of the book. He immerses us in the life and times of Nostradamus. Although many of the episodes are fictionalized, they make pleasant reading and appear to be historically accurate. The attempts to match Notradamus' predictions with historical events of the renaissance are for the most part very well reasoned. The book concludes with a rather long section bearing on events of the twentieth century.
