Imagine trying to make sense of Timothy Leary's eight neurological circuits, G.I. Gurdjieff's self-observations exercises, Alfred Korzybski's general semantics, Aleister Crowley's magical theorems, and the several disciplines of Yoga; not to mention Christian Science, relativity, quantum mechanics and many other approaches to understanding the world around us. Readers have been known to get angry, cry, laugh, and even change their entire lives. Practical techniques to break free of your "reality tunnels".

A concise and professionally-researched summary of Robert Anton Wilson's book: "Prometheus Rising". From Alden Marshall ' s Condensed Esoterica series, this complete summary provides a fast and straightforward way to understand and study the main ideas and concepts of the original source text. About the Original Book: Prometheus Rising by Robert Anton Wilson is an impressive work in which the reader is familiarized, through the 18 chapters, with the concept of circuits intrinsic to the nature of humanity and its psyche. Circuits or imprints are eight in number, being divided by the author in four circuits that are primitive and natural, while the other four are more recently developed and superior to the prior. The aim of the book is to provide the reader with the understanding of the eight circuits, the way in which they work, where they originate and are located within the brain and, eventually, how they can be altered or controlled. Why would someone wish to do so? The author gives a few reasons such as evolution, advancing to the next stage of human history, and world peace. Each chapter ends with a set of exercises that fully engage the reader ' s understanding of the topic at hand. Added-value of this summary: * Save time * Understand the key concepts * Expand your knowledge Note to readers: This is an unofficial summary and analysis of the book and not the original book itself. Alden Marshall and the Condensed Esoterica Collection are wholly responsible for this content and are not associated with the original author in any way. Robert Anton Wilson's final book explores the "relativity of reality" in a mind-bending stream of essays. Among other topics, the master of guerrilla ontology examines The Celtic Roots Of Quantum Theory, Schrödinger's Other Cat, Joyce & Daoism, Sexual Alchemy, Left and Right: A Non-Euclidean Perspective, and Cheerful Reflections On Death And Dying. RAW's description of his run for Governor of California as the candidate for his Guns & Dope Party offers a delightfully absurd view of an improbable Maybe in terrestrial politics. "I wrote these polemics, poems, neurolinguistic experiments and assorted meanderings over a period of about 45 years," and in reflecting on this extraordinary collection of his writings, the brilliant and modest Model Agnostic adds, "I don't believe anything, but I have many suspicions . . . These suspicions have grown over 72 years, but as a rather slow and stupid fellow I do not have the Chutzpah to proclaim any of them as certitudes." "A SUPER GENIUS . . . He has written everything I was afraid to write." - Dr. John Lilly, writer, neuroscientist and psychonaut "One of the leading thinkers of the modern age." - Barbara Marx Hubbard, Foundation for Conscious Evolution "A masterful satirist who views history as an open question." - Brad Linaweaver, Atlanta Constitution "I have learned more from Robert Anton Wilson than I have from any other source." - Comedian George Carlin

This, for my money, is the most spectacular non-fiction work that Wilson ever penned, breathtakingly adventurous in both its content and its strikingly experimental form. Uncertain and demonstrably uncaring whether it's a piece of literary criticism, metaphysical discussion or anthology of diverse esoteric writings, this remarkable compendium is best seen, in the spirit of its title, as a glorious accidental dance of meaning, modernism and mythology. - Alan Moore, from his introduction to Coincidence - The Robert Anton Wilson Trust Authorized Hilaritas Press Edition

Throughout human history, thoughts, values and behaviours have been coloured by language and the prevailing view of the universe. With the advent of Quantum Mechanics, relativity, non-Euclidean geometries, non-Aristotelian logic and General Semantics, the scientific view of the world has changed dramatically from just a few decades ago. Nonetheless, human thinking is still deeply rooted in the cosmology of the middle ages. This is the book to change your way of perceiving yourself -- and the universe. Some say it's materialistic, others call it scientific and still others insist it's mystical. It is all of these -- and none. The book for the 21st Century, complete with exercises. Picks up where "Prometheus Rising" left off. Some say it's materialistic, others call it scientific and still others insist it's mystical. It is all of these -- and none.
