This book is a comprehensive resource on vaccines and immunizations for primary care physicians, advanced practice providers, and trainees. We are now seeing a rise in measles and the potential for rises in other previously rare infectious diseases, significantly due to public and physician misconceptions and misinformation about vaccines. The text addresses this issue by consolidating historical and current advances in vaccine science from how vaccines are developed to CDC recommendations on how and when to administer them. Expert authors also address barriers to improving vaccination rates in the U.S. and offer evidence-based recommendations on overcoming those barriers. Surely you've experienced something like this: you buy a red car, and suddenly red cars appear everywhere. Why? Because you're focusing on red cars—and you get more of whatever you focus on. But much of the time, consciously and unconsciously, we dwell on what we don't want, and that's what we get.

Drawing on the latest scientific research, Laura Goodrich shows you how to stop fixating on negatives and rewire your brain to focus on positive outcomes.

Unique and practical exercises—including a free online toolkit—and dozens of enlightening real-life stories help you identify what you truly want so that it drives everything you do. And Goodrich shows how Seeing Red Cars can build organizational cultures in which

Since the coming into force of the United Nations Law of the Sea, states have been targeting outlying islands to expand their exclusive economic zones, simultaneously stirring up strident nationalism when such plans clash with those of neighbouring states. No such actions have brought the world closer to the brink of war than the ongoing face-off between China and Japan over the Diaoyu/Senkaku islands, an uninhabited archipelago in the East China Sea. In this timely and original book, Godfrey Baldacchino provides a detailed exploration of seven tried and tested solution protocols that have led to innovative 'win-win' solutions to island disputes over the last four centuries. A closer look at the circumstances and

processes that brought contending regional powers to an honourable, even mutually advantageous, settlement over islands provides a convincing and original argument as to why the conflict over the Diaoyu/Senkaku islands need not conclude in a 'zero-sum' or 'winner takes all' solution, as is the likely outcome of both open conflict and international arbitration. The book will be of interest to scholars and practitioners concerned with the festering Diaoyu/Senkaku dispute, as well as students, scholars and policy specialists in geography, geopolitics, international relations, conflict studies, island studies, Asian studies and history.

JavaScript libraries exist to provide most of that Ajax/DOM Scripting functionality out of the box. Application programming interfaces (APIs) exist to allow you to transplant complicated applications such as Google Maps and Flickr right into your own web sites. And hosting services such as Flickr and YouTube provide all you need to store and retrieve your media (be it images, video, or whatever) at your leisure, without having to worry about bandwidth issues and file naming nightmares.
