Yes, there are a great deal of errors in this unofficial technical manual produced in 1992 in Canada. And the drawings, while extensive across its 80 pages. But the astounding fact about this Star Trek Technical Manual is that it was made entirely by an 11 year old boy, in the early 1990s before any semblance of the internet was around. Astonishing to examine, the detailed documentation and original technical drawings in this book betray a creative skill to the 11 year old author well beyond their years. A wonderful and nostalgic examination of the Star Trek universe from the

perspective of a child just as Star Trek: The Next Generation's popularity peaked in popular culture (and pre-Deep Space Nine). The amazing talent that oozes from this book more than make up for the errors and incompleteness. The author wrote and published the original manuscript themselves using an Apple Macintosh Classic computer and most of the drawings and text were completed in MacDraw and MacWrite, respectively. Digitized and reproduced with the author's permission. Enjoy!

and the others that these copies are precisely correct  
and complete as authorized. We believe some of your

civilians are confused because they are unfamiliar with the system and arrangement of Technical Orders, therefore, we offer the following by way of clarification. 2. The print-out version of the Starfleet Technical Manual, as used by the Starfleet Academy, is a collection of only those Technical Orders necessary to the indoctrination of new cadets until such time as they become experienced in the use of the data read-out stations of Mastercom/SFHQ. Further, the Terran version contains even fewer Technical Orders because of the prohibition of the Prime Directive. Neither version is a book of pages as the questioners seem to think – nor do they contain all of the technical information stored in the data banks of Mastercom/SFHQ. Your civilians must understand these technical data banks contain all the knowledge presently known to the United Federation of Planets from all the member planets. If it were to be published in book form, the sum total would amount to more books than you now have stored in your libraries. Obviously, this cannot be done. It is equally obvious that you cannot have the galactic knowledge of future centuries given to your planet as a gift; you must earn it by your own efforts just as others have done. 3. In the Terran version, the General Index summarizes the subject area groupings by Technical Order number blocks as a part of the total system of classification. It does not give the total classification system, nor does it indicate whether or not such subject matter is available. The Introduction (T.0:00:00:06) for instance, is not included because it has not been authorized for release at this time. Each Section Index lists the Technical Orders currently approved for each section, and shows the correct issue by authentication date (and

# File Type PDF Star Trek Technical Manual

amendment code – if required). Thus a Section Index shows whether or not a particular manual contains the correct issues. Those listed with an asterisk may become available in a future print-out from Mastercom/SFHQ. Other Technical Order numbers that are missing do not appear by reason of the prohibition of the Prime Directive, or they have not been approved for release at this time. 4. In as gentle and as diplomatic a manner as we may, we would like to point out that this confusion is just another example of the many primitive attributes of your planet that prevents its acceptance into the United Federation of Planets at this time in your current calendar. But be patient, the day will come when your planet will have finally overcome these obstacles, and take its place in the intergalactic community of intelligent life forms. Live long and prosper.
